

25 JAN 1984

MEMORANDUM FOR: Central Registrations Branch
Office of Training and Education

STAT ATTENTION:

FROM:

Deputy Chief, Industrial Security Branch
Office of Security

SUBJECT: Industrial Security Seminar .

1. Per my conversation with [] it is requested that Room 1A-07 be reserved for the Industrial Security Seminar conducted by the Industrial Security Branch/Office of Security during the period 15, 16 and 17 October 1984. It should be noted that on 17 October, the room will only be required for use until noon. In short, a 2 1/2 day conference is planned.

2. I appreciate Terry's clarification of room booking procedures.

3. Please contact the undersigned on [] if additional information is required.

In relation to her comment regarding the non-removal of a personal computer from a SCIF once it is used explained that this is a standard firm recommendation by ISSG. Once used in a SCIF, a personal computer is considered a piece of classified equipment and must be protected as such. ISSG cannot allow individuals to make the determination that information entered into the computer is not classified. Sanitization of tapes and magnetic media is a security problem in that some are impossible to degause and whether a medium can be overwritten is still a controversial topic.

Also, there are so many variations of personal computers that ISSG cannot accept statements that certain information was completely removed from a personal computer.

ISSG will review individual circumstances on a case-by-case basis and if all the factors are valid, ISSG will waive this restriction.
